## ABOUT OUR BUSINESS

TECHVISION has implemented a unique offer for its customers, based on the high level of professionalism of our employees in various fields of information technology. The main direction for the development of our business was the development of our own software and equipment used in a variety of services working through the Internet world network. A significant share of TECHVISION's profit is the creation, improvement and active use of mining equipment, technologies to reduce the energy consumption of servers and special equipment for mining. As for the software, the main areas of its application are resources that provide betting services, various trading platforms, poker rooms and other resources that suggest the possibility of working via the Internet. After preliminary setup, this program independently operates on trading and gaming platforms, using the algorithms laid down by the developers to obtain the desired result, thus allowing to increase the Company's profit, without attracting new employees. And TECHVISION employees can only monitor the maintenance of the equipment. This system of work is revolutionary and does not have real competition in the market now, which makes TECHVISION unique and even more interesting for the end user.

## QUICK START

The investors' profit in Quick Start group of investment plans is achieved through the use of investors' funds in such areas as betting and poker. In order to do this, TECHVISION uses specialized and absolutely unique software of its own design, which allows you to fully automate the process of making a profit by using the algorithms for calculating possible combinations based on statistics of previous results, which makes the profit from this type of activity guaranteed and absolutely safe, regardless of the circumstances.

## PERFECT STABILITY

The investors' profit in this group of investment plans is achieved by the company through the use of investors' funds in such areas as mining and crypto trading. High mining results are achieved through the use of new generation mining equipment, which is the company's own development. As for crypto trading, this direction is the most profitable and safe as the company has much to do with mining of various types of cryptocurrencies, so the company's specialists are always aware of any changes in this area.

## COMPOUNDING ALL-IN

The Compounding All-in group of investment plans is an absolutely unique TECHVISION system which involves the simultaneous distribution of investor funds in all relevant business areas that are available to the company - mining, poker, betting and crypto-trading. This system is managed by a separate specialized module which allows not only to diversify such investments, but also makes it possible to capitalize the profit received which in turn justifies the terms of the deposits, the terms of payments on them and the increased level of profitability.

# PERFECT STABILITY

The Perfect Stability group of investment plans does not provide a return of the invested amount. The value of the invested amount is included in the daily accruals which are carried out on business days in all investment plans of this group.

**The validity of the plans is indicated in business days.**

Primary Stability Investment Plan will give 2.8% profit over 80 business days, Primary Currency plan provides 3.2% profit on the invested amount over 85 business days, Primary Revenue plan will bring 3.4% profit over 90 business days and plan Primary Profitability will provide 3.6% of the invested amount in 100 working days.

The Client receives accrual of profit the next day after opening of the deposit.

Below you can see the ranges of investment amounts depending on the investment plan.

Deposit Name	Input range	Deposit term	Daily income	Total profit	Body conclusion	Accruals
<b>Primary Stability</b>	USD 1000 - 7500	Days 80	<b>% 2.80</b>	<b>% 224</b>	No	Mon - Fri
